Tropical

The Himalayan mountains are in Asia and they are one of the biggest Mountain ranges in the world there is lots of deadly

of deadly

RETURN

Temperate

Temperate region is England sometimes it's wet sometimes it's hot but the best thing about England or the temperate region is we have just enough rain to keep of vegetation not like arid areas which will Not have lots of rain. It is mostly dryness and sand not much vegetation. Good thing about England has lots of lovely things like plants and lovely flowers what is an arid areas it would hi hardly any lovely flowers and plants.the average temperature is anywhere between -10 or 38.7 degrees.

RETURN

Mediterranean

Mediterranean is mostly known for it's clear blue waters. Its got lovely scenery And have lovely houses and it makes you feel lovely and The temperature in the Mediterranean between 30 to 100

Degrees.The coldest month is in between 18 degrees or -3 degrees. The scenery is also one of

the top main features of the Mediterranean is a great Place to visit if you win I think you'd really enjoy yourself.

RETURN

Arid

Temperatures can reach as high as 130 degrees or as low as -30 degrees. The temperatures will depend on the latitude of the desert.

The farther from the equator the colder they will be. On the map above you can see areas of cold desert (light red) and hot desert (dark red), and distance from the equator is clearly the cause.
